

**Does your EMR feel like a
'Black Hole' of patient information?**

EMR

MDN PHOENIX can help.

Your new hospital system is generating tons of data. Data 'they' said you could 'easily access' to help improve patient conditions leading to lower costs and better quality. **But you can't get to the data. It's like a 'Black Hole'.** You know it's there, but you can't access it. **Until now, with MDN PHOENIX.**
